

What Can You Bring Into Singapore?

Many travellers may wish to bring in food, animals, fish and plants into Singapore, but do you know that there are restrictions on what you can bring in from overseas?

The Agri-Food and Veterinary Authority (AVA) is responsible for ensuring a resilient supply of safe food and safeguarding the health of animals and plants for the well-being of both Singaporeans and our visitors. You can help us by observing the guidelines on the types, quantities and sources of food, animals, fish and plants that you bring into Singapore.

Bringing Food Into Singapore

No permit required for small amounts

The types of food and amounts that can be brought into Singapore from approved sources without a permit from AVA are indicated in the table. **These quantities are strictly for personal consumption and not for sale. Travellers must be aware of the risks associated with consuming such food items, which have not undergone checks by AVA.** Approved sources may change due to health and safety reasons. For the latest listing, please visit the AVA website at www.ava.gov.sg.

Larger amounts require a permit

You may bring in larger quantities of these products if you have an import permit from AVA. You must also comply with the various prevailing import conditions, for example, the submission of health certificates, and the requirement for the product to be inspected and sampled among others.

Bringing Animals, Fish And Plants Into Singapore

Travellers bringing in animals, fish and plants into Singapore require an import permit from AVA. If these animals, fish and plants are endangered species listed under CITES (www.cites.org), a CITES export or re-export permit from the exporting country is also needed. Other conditions like AVA's veterinary and plant health requirements will also need to be complied with.

If you bring in quantities in excess of your personal allowance, you will have to comply with additional prevailing import requirements which apply to commercial imports. For more information, please visit the AVA website at www.ava.gov.sg
