

A-10 /280213

REPUBLIC OF SINGAPORE

THE ANIMALS AND BIRDS ACT (CHAP.7)

VETERINARY CONDITIONS FOR THE IMPORTATION OF DOGS/CATS FOR COUNTRIES UNDER CATEGORY D (4/5)

I COUNTRY /PLACE OF EXPORT

Any country/place except countries/places listed under Category A, B, and C of the Veterinary Conditions for the Importation of Dogs/Cats.

II PURPOSE

Any purpose.

III IMPORT LICENCE

Each animal shall be accompanied by a valid import licence issued by the Agri-Food and Veterinary Authority (AVA) of Singapore.

IV VETERINARY CERTIFICATION

The animal shall be accompanied by:

- (a) a veterinary certificate (in accordance with the attached template) bearing a date not more than seven (7) days prior to export, signed by a *government approved veterinarian* of the country of export and endorsed by a *an official government veterinarian of the country of export*, describing the age, breed, sex, colour, markings or other points of identification of dog/cat and certifying to the effect that:
- (i) the dog/cat was examined by the government approved veterinarian and found to be healthy, free from any clinical sign of infectious or contagious disease and fit for travel at the time of export.
 - (ii) the dog/cat has been examined by the government approved veterinarian at the time of export and found to be implanted with a microchip that bears the identification code as that indicated in the veterinary health certificate and the vaccination certificate.
 - (iii) the dog/cat must have valid vaccination against rabies using an inactivated vaccine or recombinant vaccine acceptable to AVA at least six (6) months prior to export. This refers to a valid primary vaccination and/or up to date booster(s) according to the vaccine manufacturers' recommendations. The dog/cat must have a blood sample taken and tested for acceptable rabies antibody levels at least one (1) month after the above vaccination and within six (6) months prior to export.
 - (iv) in the case of a dog, the dog was vaccinated according to the vaccine manufacturer's recommendations and not less than two (2) weeks prior to export against Canine Distemper, Canine Hepatitis and Canine Parvoviral infection.
 - (v) in the case of a cat, the cat was vaccinated according to the vaccine manufacturer's recommendations and not less than two (2) weeks prior to export against Cat Flu (Feline calicivirus and Feline viral rhinotracheitis) and Cat enteritis (ie Feline Panleukopaenia/ Feline parvovirus).
 - (vi) the dog/cat has been treated with a product effective against external parasites (fleas and ticks) between 2 and 7 days of export (*state active ingredient and date of treatment*), and with a product effective against internal parasites (nematodes and cestodes) between 2 and 7 days of export (*state active ingredient and date of treatment*).
- (b) the dog/cat's original vaccination certificate, which also bears the identification code of the microchip that has been implanted. The vaccination certificate also bears the details (name of veterinarian, name and address of veterinary practice) and endorsement of government-approved veterinarian who vaccinated the dog/cat and verified the microchip identification code.

V DECLARATION FROM MASTER/CAPTAIN OF SHIP/AIRCRAFT

Not required.

VI QUARANTINE

Upon arrival the animal shall be vaccinated with an anti-rabies vaccine (irrespective of whether it had been vaccinated before import) and subsequently quarantined for a period of not less than 30 days. The owner or his agent is responsible for ensuring that quarantine space is available at the Sembawang Animal Quarantine Station.

VII APPLICATION FOR IMPORT LICENCE

The owner or his agent must apply for the import licence by submitting an online application through AVA's website (www.ava.gov.sg>Services>Animals&Pet Sector>Licence to Import/Export/Transship of Animals/Birds/Eggs/Biologics) 30 days prior to the arrival of animals. The Application and Acceptance for Quarantine of Dogs and Cats at Sembawang Animal Quarantine Station (SAQS) must be attached to the online application form.

VIII NOTIFICATION OF ARRIVAL

The owner or his agent shall contact the Quarantine Office as stated in the Import Licence at least five (5) working days before the arrival of the animal.

IX VETERINARY INSPECTION

On arrival at the port of disembarkation in Singapore, the dog/cat and documents (Import Licence, Veterinary Health Certificate) shall be presented to and examined by an authorised Veterinary Officer. If the animal is found to be healthy and documents are in order, the animal shall be taken to the Sembawang Animal Quarantine Station by a Quarantine officer.

X PENALTY

- (i) If the animal does not meet the pre-export vaccination requirement, the animal shall be vaccinated upon arrival and subjected to serology tests for acceptable rabies antibody levels one (1) month after vaccination. The animal shall be quarantined at the Sembawang Animal Quarantine Station for a period not less than 180 days after vaccination.
- (ii) If the animal does not meet the requirement of pre-export serology tests for acceptable rabies antibody levels, the animal would be subjected to serology tests upon arrival and shall be quarantined at the Sembawang Animal Quarantine Station for a period not less than 30 days until a satisfactory serology test result is obtained, whichever is later. The animal may be returned to the country of export if the serology test result does not meet AVA's requirement.
- (iii) If any animal is not healthy or if any document is not in order or quarantine space is unavailable, the animal shall be returned to the country of export, **detained for up to two weeks** for observation prior to quarantine or destroyed at the discretion of the Director-General of Agri-Food and Veterinary Services.

XI FEES

- (i) Import Licence } }
- (ii) Accommodation fee at Changi Animal & Plant Quarantine Unit } see Fee Schedule:
- (iii) Transport charges to Sembawang Animal Quarantine Station } Attachment-1
- (iv) Quarantine fee at Sembawang Animal Quarantine Station } }
- (v) Rabies Vaccination } }

XII OTHER REQUIREMENTS/INFORMATION

- (i) Owners should take into account the age and condition of their animals as well as travel and climatic stress when deciding to export their dogs/cats to Singapore.

BREED RESTRICTIONS

- (ii) The following breeds of dogs and their crosses are not allowed to be imported into Singapore - Pit Bull(which includes the American Pit Bull Terrier also known as the American Pit Bull and Pit Bull Terrier, American Staffordshire Terrier, Staffordshire Bull Terrier, the American Bulldog, and crosses between them and with other breeds) Neapolitan Mastiff, Tosa, Akita, Dogo Argentino, Boerboel, Fila Brasileiro, Perro de Presa Canario and their crosses.
- (iii) Bengal cat crosses imported into Singapore require documentary proof that they are at least a 5th generation cross from the ancestral stock of *Prionailurus bengalensis*. 4th generation crosses and below cannot be imported to Singapore as pets as they are not considered domesticated cats.
- (iv) Savannah cat crosses imported into Singapore require documentary proof that they are at least a 5th generation cross from the ancestral stock of *Leptailurus serval*. 4th generation crosses and below cannot be imported to Singapore as pets as they are not considered domesticated cats.
- (v) Cats are not allowed to be kept in Housing Development Board (HDB) residential units.

MICROCHIP

- (vi) The microchip that is implanted into the dog/cat must meet with ISO (International Standards Organisation) Standard 11784 or Annex A to ISO Standard 11785. If the dog/cat is implanted with a microchip which does not comply with these stated ISO Standards, the owner of the dog/cat or his authorised agent must provide a reader which is able to read the identification code of the implanted microchip at the point of entry into Singapore.

TRANSPORTATION

- (vii) Owners must ensure that the animal has been transported in escape-proof containers conforming to the latest International Air Transport Association's (IATA) Live Animal Regulations (if transport is by air).

A-12 /280213

- (viii) Owners should ensure to the best of their ability that the animal is not pregnant at the time of export. Should the animal whelp in quarantine, the owner must ensure that adequate quarantine facilities and veterinary care are available for the well-being of the newborn animals. The owner must bear any additional costs as a result of such an event.

OTHER LICENCES

- (ix) Owners of any dog above 3 months of age must apply for a licence to keep the dog in Singapore. See Fee Schedule: Attachment-1.
- (x) Owners should be aware of the conditions of licence for dogs available through AVA's website (www.ava.gov.sg/Services/Animals&Pet Sector/Dog Licence), which is not limited to but includes the following requirements:
- A maximum of 3 dogs may be kept in private premises.
 - Only one (1) dog of an approved breed is allowed in a HDB residential unit.
 - The following breeds of dogs must comply with additional conditions listed below - Bull Terrier, Doberman Pinscher, Rottweiler, German Shepherd Dog with its related breeds such as the Belgian Shepherd Dog and the East European Shepherd Dog, Mastiffs including the Bull Mastiff, Cane Corso and Dogue De Bordeaux, and crosses between any of the above breeds and other breeds:
 - a. Only one (1) dog from the above breeds is permitted to be kept in a premise.
 - b. The dog must be leashed and securely muzzled when in a public place.
 - c. Owners must take up an insurance policy for at least \$100,000 and a banker's guarantee for \$2,000.
- (xi) A licence must be obtained from AVA to use any place for exhibition, sale or export of any animal or bird.

OTHERS

- (xii) Any expenditure incurred in the process of importation shall be borne by the owner or agent. Any loss occasioned during the removal, handling or treatment of an imported dog/cat under the directions of AVA or occurring during the period of detention in quarantine, shall be borne by the owner or agent.
- (xiii) Regulations and fees are subject to change without notice notwithstanding the issuance of a licence by AVA.

VETERINARY CERTIFICATE FOR THE IMPORT OF DOGS AND CATS INTO SINGAPORE

For Category D countries: all countries other than those listed in Categories A, B or C

AVA Import Licence No.: _____ Veterinary Certificate No. (if applicable): _____

N.B. A valid AVA Import Licence to import the dog/cat must be obtained before shipment.

SECTION I IDENTIFICATION OF THE DOG/CAT

Species: _____

Breed: _____

Name of animal: _____

Sex (please circle): Male Neutered Male Female Neutered female

Age or Date of Birth: _____ (animal must be at least 12 weeks of age at the time of export)

Colour: _____

[N.B. The following breeds and their crosses are prohibited for import: Pit Bull (including the American Pit Bull Terrier also known as the American Pit Bull and Pit Bull Terrier, American Staffordshire Terrier, Staffordshire Bull Terrier, the American Bulldog, and crosses between them and other breeds), Neopolitan Mastiff, Tosa, Akita, Dogo Argentino, Boerboel, Fila Brasileiro, Perro de Presa Canario and their crosses; Bengal and Savannah cat crosses of 4th generation and below.]

Microchip Number: _____

The animal has been scanned on _____ (day/month/year) prior to export and found to be implanted with a microchip bearing the above microchip number, which is also reflected on the animal's vaccination certificate.

SECTION II ORIGIN OF THE DOG/CAT (indicate the option that applies)

After due enquiry I am satisfied that the dog/cat (delete as appropriate) identified in this certificate is not under quarantine restriction at the time of export.

SECTION III SANITARY INFORMATION

I, _____ (Name in BLOCK LETTERS), the undersigned veterinarian, being a Government approved veterinarian / Official government veterinarian (delete as appropriate) of _____ (the country of export), certify in respect of the dog/cat (delete as appropriate) described above that:

General Vaccinations (strike out whichever does not apply)

The dog was vaccinated against Canine Distemper, Canine Infectious Hepatitis, Canine Parvovirus, according to the vaccine manufacturer's recommendations and at least 14 days prior to export.

Date of vaccinations:

Canine distemper: _____ (day/month/year)

Canine infectious hepatitis: _____ (day/month/year)

Canine parvovirus: _____ (day/month/year)

The cat was vaccinated against Feline Calicivirus, Feline Rhinotracheitis Virus and Feline Panleukopenia Virus according to the vaccine manufacturer's recommendations and at least 14 days prior to export.

Date of vaccinations:

Feline Calicivirus: _____ (day/month/year)

Feline Rhinotracheitis Virus: _____ (day/month/year)

Feline Panleukopenia Virus: _____ (day/month/year)

Rabies Vaccinations and Serological Testing

The dog/cat was vaccinated against rabies using an inactivated vaccine or recombinant vaccine acceptable to AVA at least 6 months prior to export. The vaccination must be a valid primary vaccination or a valid booster vaccination according to the vaccine manufacturer's recommendations.

Date of rabies vaccination: _____ (day/month/year).

At least 1 month (30 days) following the date of this vaccination and within 6 months prior to export, a blood sample was taken from the dog/cat and tested with [an OIE-prescribed test¹](#) showing a rabies neutralising antibody titre equal to or greater than 0.5 IU/ml. A valid test report must accompany this certification.

Date of blood sampling: _____ (day/month/year)

Rabies neutralising antibody titre: _____ IU/ml

Dog/cat imported under this protocol and fulfilling the above would be subjected to rabies vaccination on arrival and following which quarantine for a period of not less than 30 days upon import.

External Parasite Treatment

The dog/cat was treated with a product effective against external parasites (fleas and ticks) between 2 and 7 days of export.

Date of treatment: _____ (day/month/year)

Name of product: _____

Active ingredient: _____

Internal Parasite Treatment

The dog/cat was treated with a product effective against internal parasites (nematodes and cestodes) between 2 and 7 days of export.

Date of treatment: _____ (day/month/year)

Name of product: _____

Active ingredient: _____

Pregnancy (for females)

After due enquiry I am satisfied that the animal is not pregnant at the time of export.

Prohibited breeds

After due enquiry I am satisfied that the animal is not one of the prohibited breeds or crosses as listed in Section I.

Clinical examination

Within 7 days of export I have examined the dog/cat and found it to be healthy, free from any clinical sign of infectious or contagious disease and fit for travel at the time of export.

¹ Currently, OIE-prescribed tests for international trade for rabies include the Fluorescent Antibody Virus Neutralising (FAVN) Test, the Rapid Fluorescent Focus Inhibition Test (RFFIT), and the Enzyme-linked Immunoassay (ELISA).

Endorsement

Sections I to III may be endorsed by a government-approved veterinarian or an official government veterinarian.

Signature: _____ Date: _____ (day/month/year

Name of government-approved veterinarian or an official government veterinarian (delete as appropriate):

Address, telephone, fax, email of practice: _____

SECTION IV (must be endorsed by official government veterinarian)

I, _____ (Name in BLOCK LETTERS), the undersigned veterinarian, being an Official government veterinarian of _____(the country of export), certify in respect of the dog/cat (delete as appropriate) described above that:

After due enquiry and examination of documents, the dog/cat is not under quarantine restriction at the time of export.

I have no reason to doubt the truthfulness of the information given in Sections I to III and am satisfied to the best of my ability that the dog/cat certified above meets with the requirements for importation into Singapore.

CERTIFICATION VALIDITY: This certification is valid for seven (7) days.

Signature: _____ Date: _____ (day/month/year)

Name of official government veterinarian: _____

Address, telephone, fax, email contact:

Official Stamp:

Import Clearance of your pets upon their arrival in Singapore

Confirmation of import

- The owner/agent must notify AVA's Changi Animal and Plant Quarantine (CAPQ) of the confirmed import via telephone or email, at least five (5) working days before arrival of the pet. Information such as the confirmed flight details, owner's details and import licence number must be provided.

If your pet is imported as manifested cargo

- Upon arrival at the Changi Airfreight Centre, you must present a copy of the AVA import licence and your identity card or passport to the Police Pass Office, located at the entrance of the cargo complex, to exchange for a Visitor Pass.
- After you have obtained the Visitor Pass, you must proceed to the cargo office (SATS/DNATA) of the relevant airline that carried your pet to Singapore.
- At SATS/ DNATA, you must produce the AVA import licence and collect **all** documents accompanying your pet. This includes the pet's original health certificate, original vaccination records, original rabies serology test result, airway bill and Captain's declaration (where applicable).
- You will then be directed to the SATS / DNATA cargo section to claim your pet.
- Once you have collected your pet, you must bring your pet immediately to AVA's CAPQ office for inspection and clearance. Please note that you are not to break the seal (if any) on the pet cage/ crate, or take your pet out of the cage/crate.

Directions to CAPQ from SATS / DNATA

- Upon leaving the SATS/DNATA building, drive down the Airport Cargo Road until you reach a junction with a "U-turn" sign. Make a "U-turn" and continue along the road. After the bend, there will be a bus stop on the left, turn left into Gate C7 located after the bus stop (look out for green fencing and AVA CAPQ signage).

If your pet is imported as accompanied/ excess baggage

- After you have disembarked from the aircraft, proceed to the "Lost & Found" counter located at the arrival hall near the baggage belt (before Customs/Immigration Clearance). Surrender your pet to the officer at the Lost & Found counter. Make sure that you sign the handing over form.
- You are not allowed to take your pet out of the Customs/ Immigration area in the arrival hall of the Passenger Terminal.
- Your pet will be transferred to AVA CAPQ office by the relevant ground handling agent (SATS/ DNATA) for inspection and clearance. You must then proceed to CAPQ, located at the Changi Airfreight Centre with your pet's original health certificate, original vaccination records, original rabies serology test result and AVA import licence.

Veterinary Inspection/ Verification of Documents

- At CAPQ, the AVA officer will verify the AVA import licence, your pet's health certificate, vaccination records, rabies serology test result and Captain's declaration (where applicable). The AVA officer will visually inspect your pet to ensure it is clinically healthy, and verify your pet's microchip number.
- Pets that require quarantine upon arrival in Singapore will be held at CAPQ after veterinary inspection. An AVA-appointed transport service will be arranged to send your pet to Sembawang Animal Quarantine Station (SAQS) to undergo quarantine.

CAPQ Address:

Gate C7, Airport Cargo Road
Changi Airfreight Centre
Changi Animal & Plant Quarantine
Singapore 918104
Tel: 6545 7523
Email: AVA_Import&Export_Animals@ava.gov.sg
Website: www.ava.gov.sg

CAPQ Operation hours:

Mondays to Saturdays: 8:00AM to 10:30PM
Lunch: 1-2PM (Office closed)
Sundays and Public Holidays: Closed

Getting to CAPQ:

By Bus: 9, 19 and 89 (alight at the 3rd bus stop after Police Pass Office, along Airline Road)

By MRT: Bedok (transfer to bus 9), Tampines (transfer to bus 19)

From Airport Passenger Terminal: Drive or take a taxi to Changi Airfreight Centre (Travel on ECP and exit 2A towards Changi Airfreight Centre)

- CAPQ is not located within passenger terminal premises.

Please be informed that this travel information is meant for commuters without pets. Pets are not allowed on buses and MRT trains.
