Meat Traders

Dear Sir / Madam

OUTBREAK OF AVIAN INFLUENZA (AI) IN HOLSTEBRO MUNICIPALITY, DENMARK

Denmark reported an outbreak of H5 Low Pathogenicity Avian Influenza (LPAI) in a duck holding near the town Vinderup, in Holstebro municipality in the western part of Jutland.

In view of the outbreak, AVA will impose a temporary restriction on the importation of poultry and poultry products to the 1 km restricted area around the affected premises in Holstebro municipality, Denmark, with effect from 5 May 2018. Heat-processed poultry products, which meet the requirements for destruction of AI virus, will not be affected by the import restriction. For import from unaffected areas in Denmark, additional certification is required on the veterinary health certificate as listed on Annex 1.

Please contact Ms Lily or Ms Zawiyah at 6805 2857 / 6805 2863 should you have any enquiries on the import of poultry and poultry products.

Yours faithfully

Li Lu

Annex 1

The additional certification should state on the Veterinary Health Certificate:

- a. Highly pathogenic avian influenza (HPAI) and H5 and H7 low pathogenicity avian influenza (LPAI) are notifiable diseases in the country of export.
- b. The birds from which the meat was sourced were not vaccinated against H5 and H7 subtypes of avian influenza (AI), as defined by the World Organisation for Animal Health (OIE).
- c. The poultry meat and meat products were not derived from birds originating from the 1 km radius restricted area around the affected premises in Holstebro municipality.
- d. The poultry from which the meat was derived were born, raised, and slaughtered in Denmark, or were legally imported as day old chicks from countries with equivalent poultry health status.
